

INTERSEX

is nothing new. It has existed throughout the worlds of animals, plants and human beings since the dawn of time.

What is entirely new, though, is the prevalence of **INTERSEX** in humans and animals.

Numbers are exploding thanks to pollution and a planet under extreme stress.

Intersex people did not ask to be born **intersex**. So may we suggest that you stop oppressing us, please? Think of the future – your future. Your unborn children might turn out to be **intersex**. Would you want them to be treated the way you treat us?
